

The Duncan Print Group

WORKING TOWARDS A SUSTAINABLE FUTURE

At Duncan Print Group we are committed to the care of the environment, prevention of pollution, efficient use of natural resources and compliance to all applicable legal requirements. This is not just a statement but is a commitment throughout our organisation.

We actively seek to:

- Maximise energy efficiency throughout our operation.
- Minimise waste production and wherever possible recycle waste.
- Identify, quantify, and continually improve the environmental impact of the company using Green Lean Improvement Teams, demonstrated by measures and targets under continual review.
- Work with our customers to achieve the same objectives in their organisation.

To prove our commitment, management systems are implemented to meet the requirements of ISO14001: 2004. Controls are in place to provide an unbroken chain of custody for all materials sourced from sustainable forests, meeting the requirements of the FSC and PEFC. This will provide our customers assurance that their materials are from well managed, sustainable and certified forests where biodiversity is encouraged.

Paper and board are biodegradable, recyclable and can claim unequivocally that they are available from a renewable resource, unlike many alternatives.

Technical guidance will be provided to customers in innovative packaging techniques that minimise the use of materials whilst maximising visual impact and functionality

This policy is published via the website, is available on request and is communicated to all employees.
